Important Notes

1) If the retailer calls in or sends an email and said they're getting that confirmation message while trying to place an order for a brand new vehicle and that is confusing them, that basically means the system has found that exact vehicle in the retailer's stock, and they should be fine with clicking the "Convert" button. you may also get a call before the retailer sends the email through

---

2) If the retailer is trying to tag the vehicle but it's showing that they've got no quota we just untick 'Counted against the quota system' box and they should be fine.
From ''Order modification" tab, at the bottom left corner

---

3) In case the retailer asks for an amendment, and the vehicle is in status: P, V, 00, and 10, and the retailer can't provide the config code, we can ask for the amendments that he wants to add to the vehicle, and we can make them from our side on SLI.

- If the retailer is asking to add grants to ID Polo models Status below (20) >>
  1- Right click > Commission modification
  2- X-SET : drop box and choose Basic Offer the first one
  3-Set the required week to 202639
  4- Double click on option code > choose Government electric car grant from the drop box.
  5- click on S2i on the left box and press >>Add
  6- Apply and accept
  If the status is above 20 we cannot add grants so we need to email GeneralistSales@vwg.co.uk and ask them to add the grants themselves.
- Quick Log :
  Level 1: Group Operations - Brand Support
  Level 2: Product Marketing
  Level 3: OLEV Grant On E-Vehicles

---

4) When retailer is tagging a customer and getting " Quota error on SLI"
Take order number
go to order modification, unmark the box above "SAVE"
they'll be able to Tag
let them do it before ending the call

---

5) There is another type of the transfers call "sales master transfer"
For Audi, if the retailer contacts us to follow up on a "sales master transfer" we need to check with UK team, as such requests will go through another queue we have no access to it yet and in case the retailer wants to resend the form, he can send it to Email address: Audisalesoffice@audi.co.uk

---

6) Hiya Guys, if a retailer rings up saying my pricing is not matching connect online , you need to refer them to GFS. They can contact them via the portal or gfsagency@vwg-uk.co.uk
https://sem-uk.lightning.force.com/lightning/r/Knowledge__kav/ka0cj000000MMt7AAG/view
this is on knowledge base - contact list for retailers (000010472 - use this article ref instead try this no)

7) Call notes (PC):

- Product -Tiago closed for order stock only T-cross style opens today.
- T-Roc MY27 is live today - Match trim only
- Supply – The stuck vehicles some are going to be moving week 33
- Emden bridge repairs finish work next week wont impact sept
- UK port still busy we are pushing cars to network and hopefully post september port should be ok.
- Cathy Quinn has now retired and her replacement is Emma Thomas who starts 7th sept sales support managers now align and new inbox will be getting set up soon Bill will let us know when its live.

VW0857-26-Blue and grey paint options closed for ID.5

---

8) For De-tag request with Order type : 02/03/04/05/07 - Fleet Leasing, we gonna deal with it as "Re-tail de-tag"
For De-tag request with Order type : 08/09 - Fleet Leasing, we gonna deal with it as "Agency de-tag"

---

9) If you find a delayed VWPC vehicle with a production point of 7, instruct the retailer to check the VIP portal first. If the vehicle is not listed, it is due to the six-week summer shutdown that began at the end of July.
While the vehicle may already be built, factories are currently closed.
Once operations resume, all built vehicles will be shipped out immediately.

---

10) RAVALS= Cupra RAVALS (RAVALS IN MANDATORY - DO NOT TRANSFER THEM - THERE ONLY IN MANDATORY DUE TO T/O BEEN BLOCKED

---

11) **For VWPC** Check this article on The Hub : VW3251-16
In case retailer wanted to request V5 form

---

12) We might receive calls for Audi as well regarding the delayed on the status of 20 and all we have to do is to check the sheet I have shared via email with Audi team in Cairo and inform the retailer to keep his eye on the order as most of them have no estimated time from the factory

---

13) In case we receive a request from a retailer to add a dealer contribution number to his order on the SLI to send it as a request to GFSagency@vwg.co.uk

14) Taigo to close for factory order on 4 August VW0835-26

---

15) Please see PC Conference call notes from 12/08/2026

Supply
• Simon confirmed that the Emden railway bridge repairs are now complete and deliveries are now returning to normal.
• UK Ports continue to be at full capacity. Retailers are encouraged to call stock to site as soon as possible.

Product
• the ID.3 Neo will open for order (OFO) on Thursday 13 August, following approval of the vehicle's eligibility for the UK Government's ECG (Electric Car Grant).
This will be eligible for the £1,500 grant, with all current batteries and trims eligible: VW0756-26.

• New Match trim will be added to the T-Roc line up, opening for order (OFO) on Thursday 13 August. VW0834-26

---

16) If a retailer submits a transfer request without specifying that they want to transfer customer information, the transfer is processed and de-tagged by default.
This happens because the option to keep customer details is left unchecked unless explicitly requested.
In these instances, you should manually re-tag the account and remind the retailer to explicitly request to save the customer information for future transfer submissions.

---

17) **To get the customer details from de-tagged vehicle, go to the yellow telephone and press this icon ↓↓↓**

Open another SLI to follow Re-tagging Steps:

- Navigate to Order Modification > Customer Entry.
- Enter the Customer Type.
- Input the contact information and click Find.
- Click the Telephone Icon located on the middle-right of the SLI screen.

- Enter the customer details.

Note: Re-tagging is not our standard process, please complete it if your workload permits.
Once resolved, confirm with the retailer and ask them to verify the customer information in SLI.

---

18) **Important notice**
Please refer to **Audi** and **VWCV** locations as **Centers** Ex.*"Can I have your center number?"*

All other brands remain classified as **Retailers**.

---

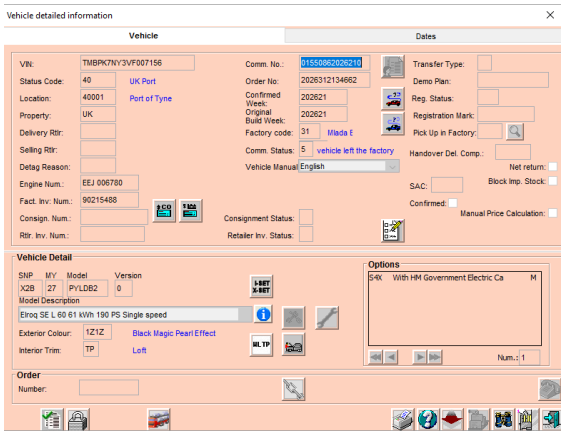

19) If the retailer has no access to Vision Portal where they can check the delayed VW PC vehicles refer them to this bullet in : FS0196-18
Hub article
https://hub.vwg.co.uk/fs/reference/renew/2.1/renew-request-access-or-removal-form-fs0196-181

The process for requesting and de-activating access to Key2Key (K2K) is now easier. You should now download the form (below) and use it to email your request to VWFS sales support at **re**RENEW request access/removal form**taileraccess@vwfs.co.uk**. The team will liaise with third parties to obtain your access to K2K and Vision.

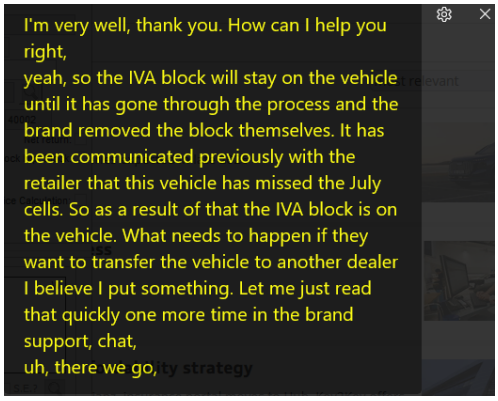

---

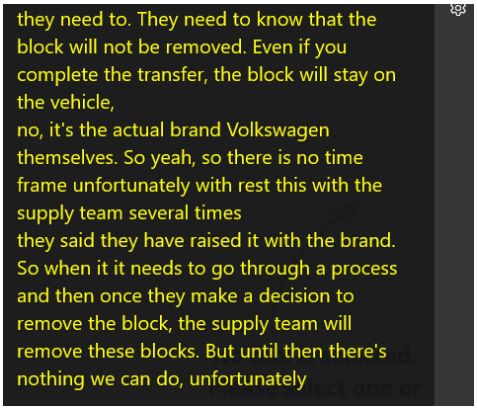

20) If you checked SLI and found the vehicle profile shows red that means that the vehicle is reported **Damaged** so it can not go under mandatory stock.

Gather RDC: email, phone number, and email cscdamageteam@vwg.co.uk for further assistance and a damage specialist will reach out. We only have 1 damage specialist, her name is Shirley.

21) In case someone calls egarding an IVA block (as per Abbas from the Audi team)

Regarding the IVA block and below u will see the official email we received, so in case u receive such request from the retailer u can advise him

Hi

The vehicle must remain blocked until the IVA application has been approved. Once this has happened, we will update SLI with the new type approval number and the blocks will be removed. At present we have no time frame for when the applications will be approved. This applies to all vehicles that have this block on them.

Centres were made aware that if these vehicles were not registered by 30th June they would be unsaleable until such time as the IVA process had been completed.

---

22) if anyone gets a CV call relating to Transporter Commerce Pro S and Sportline, these models go to conversion, the info for this is on the Production & Supply Update - CV0505-23, give this to the Van centre so they can check it out.

23) For **PC**

Model	Extended lead time
DA1 Golf - GTI Clubsport & R Black Edition **closes temporarily for stock & showroom orders from 19/06/2026**	We are currently experiencing delays on certain Golf performance derivatives due to higher-than-anticipated demand for specific trims. As a result, lead times for these vehicles are significantly longer than the average for Golf. For new orders entering status 00—particularly for Clubsport—we do not expect confirmation into production until 2027. However, we continue to request additional production capacity and prioritise customer orders, meaning there remains a possibility that some orders may progress to PSC 10 sooner. In contrast, standard Golf R and GTI models are currently undersubscribed, and orders for these derivatives are expected to arrive within more typical Golf lead times. In the case of the Edition 50, lead times fall outside standard expectations due to the unique nature of the product.
Tayron R-Line	Due to order bank volume R-Line is confirming into weeks 49 - Add Leeds Alloys to bring leadtimes down further

24) Delivery times (CV)

Transport to UK from Emden is within 10 working days (up to 20 days during peak times of February/March and August/September)

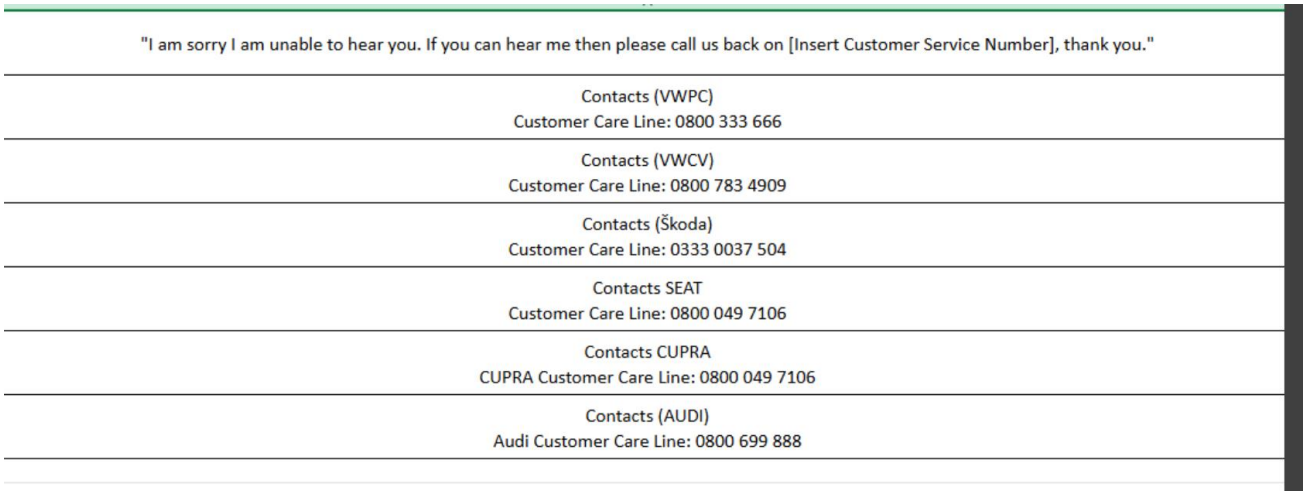

Transport from Turkey (Transporter) to UK port currently averages 37 days. 95 per cent of production arrives within 50 days

Transport from UK port to Van Centre is within 10 working days from arrival in the UK after the transport order has been generated (providing the vehicle is at the port that serves your Van Centre, known as ‘in zone’)

Transport orders are generated 10 working days before the required-by date. This will be extended during peak times of February/March and August/September so UK ports do not receive more vehicles than their capacity allows

Transport orders for Transporter product will be generated once a vehicle has been at UK port for 10 days, regardless of required-by date, so UK ports do not receive more vehicles than their capacity

25)

"I am sorry I am unable to hear you. If you can hear me then please call us back on [Insert Customer Service Number], thank you."
Contacts (VWPC) Customer Care Line: 0800 333 666
Contacts (VWCV) Customer Care Line: 0800 783 4909

Contacts SEAT Customer Care Line: 0800 049 7106
Contacts CUPRA CUPRA Customer Care Line: 0800 049 7106
Contacts (AUDI) Audi Customer Care Line: 0800 699 888

---

26) If u receive a call from a retailer regarding an error to make a registration and u find 2 blocks on SLI and status is partially registered
- Guide him on the SLI to click on the yellow telephone and then right click - From the drop menu he will choose RFO contact information- and then he can enter the agreement number "From the customer information he has", then Apply and he will see that it has been submitted successfully
After that confirm on him that the 2 blocks will be removed automatically from the system within the day

---

27) If a retailer rings up saying my pricing is not matching connect online , you need to refer them to GFS. They can contact them via the portal or gfsagency@vwg-uk.co.uk

---

28) **For PC**

ID. Polo MI cars as one has been transferred recently and we need to manage this carefully otherwise it could impact the launch weekend for the car in early November.

All retailers were allocated with 4 MI cars and these can be identified by SOC in option field. These cars have been designated to satisfy Brand standards and support the launch of the car so it's vital that you help with this by not removing any blocks or transferring the MI cars. Retailers have been informed but the recent example has shown they will still ask for this.

As a reminder, each retailer has the following MI cars in their stock:-

1 x Style LE – this is dedicated for a display car so must not be transferred
3 x Life LE – 2 of these are already tagged to demo and must not be detagged or

transferred leaving 1 Life that can be treated as stock

Can you re-emphasise this to the entire team so that no more cars are transferred or blocks removed

---

29) **If you are facing an adopted transfer please refer the retailer to these bulletins:**

VW : VW1269-21
Skoda : SK0976-21
Seat : SE0945-21
Cupra : CU0200-21
Audi : AU1225-21
CV : CV0315-23

---

30) **What prevents a demo plan from going on funding:**

1- SAC code in SLI (for WVPC only) , if this field has a code in it, it needs to be removed.
2- if there is no demo plan number (the retailer did not add it).
3- If the vehicle is not partially registered.
3- If the consignment status is not C.
4- If there's a GIS error.
5-If the invoice code is not zero (it means it's not invoicing as a demo plan).

- If there's a SAC code, the retailer needs to submit a form that will be directed to the tactical team and they will remove it.
  bulletin for the form: **VW1218-16.**

How to see on GIS if the vehicle is on demo funding
1-On GIS, go to documents- choose consignment\invoices of chassis
2- Go to financial data tab
3- Scroll to the side to see the demo plan code
4- If two rows are filled with the demo plan code (just like the one shown in SLI) then it's on funding already
5- If not, then it's not on a demo funding

31)

T-Roc Cabriolet to close for order

VW0894-26 19 AUG 2026 Share Print 0 0 54

T-Roc Cabriolet will close for factory ordering on Thursday 10 September.

Prioritise any remaining customer orders for T-Roc Cabriolet ahead of this date. After 10 September, the model will be offered from stock only.

All orders that are currently in the pipeline will be built. Please do not amend any existing orders after 10 September.

Any outstanding Fleet Agency quotations must be converted into a factory order by close of business on Wednesday 9 September to secure build allocation.

> **Action required**: contact any customers with outstanding interest or quotations as soon as possible and submit factory orders before the deadlines above to avoid disappointment.

---

32) When you have a call, ask if he pressed the wrong button while taxing a car, so you need to:

- take the VIN number
- open the vehicle icon, then go to COC request , choose queries
- enter the VIN number, then accept
- highlight the VIN and right-click
- choose bulk COC management
- change data status to standard and availability to Y
- press accept

---

33) If someone is having a reg block on SLI, the block must be remained on the vehicle ntil the IVA application has been approved. Once this has happened, Supply will update SLI with the new type approval number and the blocks will be removed. At present we have no time frame for when the applications will be approved. This applies to all vehicles that have this block on them.

Centres were made aware that if these vehicles were not registered by 30th June they would be unsaleable until such time as the IVA process had been completed.

34) **Quotations**

	Q6 and A6 e-tron	e-tron GT				
Approximate time from CP8/leaving factory to Emden	3 days	3 days	5 days	7 days	10 days	35 days
Route to UK	Train to Emden then Ship to UK	Train to Emden then Ship to UK	Train to Emden then Ship to UK	Train to Emden then Ship to UK	Train to Emden then Ship to UK	Ship to Emden then Ship to UK
Approx time from Emden arrival to UK arrival – this assumes the vehicle has been called off and is required within 30 days.	3 weeks					
Approximate time from UK arrival to centre arrival assuming required date is within 30 days of UK arrival.	6 working days					
Approximate time from build week to arrival at centre.	4 weeks	4 weeks	4 weeks	4 weeks	5 weeks	9 weeks

Audi Shipping rules are as follows:

- All ’06’ Showroom and ‘07’ Stock orders will remain in Emden until 60 days have elapsed, or until manually called off.
- Please note that it may be necessary from time to time to ship vehicles prior to 60 days due to Emden storage restrictions and shipping utilisation.
- All customer orders (‘00’ to ‘05’ and ‘08’,‘09’ & ‘11’) will be automatically called-off and will be shipped if within 30 days of the required date – known as ‘Green Flagged’.
- All A1 orders will be automatically shipped on the first available ship from Spain.

---

36) **Vehicle Re-pricing Steps**

1. Log in to SLI.
2. Open the order using Vehicle Query.
3. Click the yellow phone icon.
4. Click the pound sign (£) icon.
5. Click the Re-pricing button on the pricing screen.
6. Amend the Val date to the requested date.
   (check price data || for basic/ requested price)

7. Click the stimulation button then Save

---

37) A little reminder :

- If you find a delayed VWPC **status 38 or under with a production point of 7,** instruct the retailer to check the **Vision portal** bulletin (VW0095-26).
- **Don't forget to tell the retailer** : If the vehicle is not listed, it is due to the six-week summer shutdown that began at the end of July.
- While the vehicle may already be built, factories are currently closed.
- Once operations resume, all built vehicles will be shipped out immediately.
- **If it's status +40 with actual transport order check VIP Portal**
- **Production point of 8** is a completed one and waiting to be delivered to UK

---

38) You might get a call with retailers asking to transfer a SKDOA vehicle from **31959** account, those vehicles are only for contract hire deals, they can be transferred out as long as they're **not** already in another **retailer's stock and tagged!** So if its not showing in **31959** don't transfer it out.

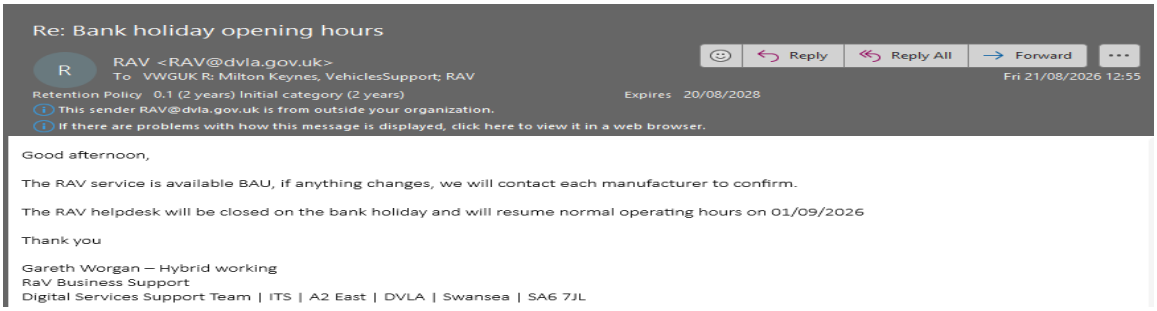

There is only limited stock so we dont want to find ourselves in a situation where we can't replace the vehicle.

If you are unsure please reach out to me or tell them to email VehicleSupport@skoda.co.uk

---

39) The DVLA's Register a Vehicle (RaV) service is generally closed on bank holidays. Standard online availability is limited to Monday through Saturday and **excludes Sundays and bank holidays.** [1, 2]

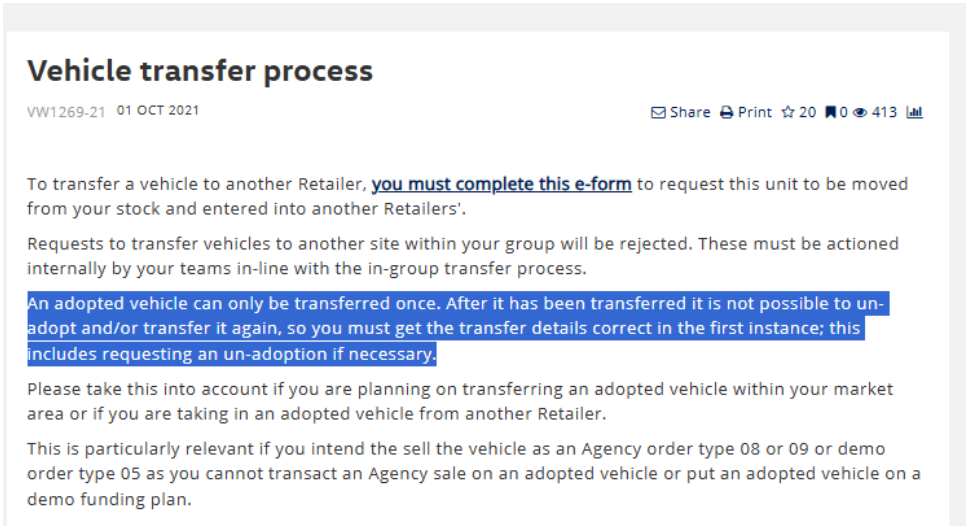

Service Hours

40) If you are unadopting to enable tagging to a funded demo or Agency just forward sell for a couple of days to allow tagging. that's all they need it for.

---

41) As shown below, we cannot process adopted transfers. You can identify these by the "A" next to the customer icon

Vehicle transfer process

VW1269-21 01 OCT 2021 Share Print ☆ 20 0 413

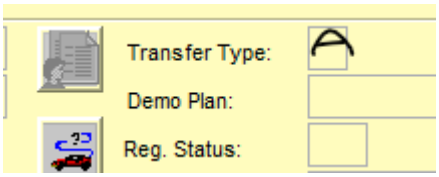

To transfer a vehicle to another Retailer, **you must complete this e-form** to request this unit to be moved from your stock and entered into another Retailers'.

Requests to transfer vehicles to another site within your group will be rejected. These must be actioned internally by your teams in-line with the in-group transfer process.

An adopted vehicle can only be transferred once. After it has been transferred it is not possible to un-adopt and/or transfer it again, so you must get the transfer details correct in the first instance; this includes requesting an un-adoption if necessary.

Please take this into account if you are planning on transferring an adopted vehicle within your market area or if you are taking in an adopted vehicle from another Retailer.

This is particularly relevant if you intend the sell the vehicle as an Agency order type 08 or 09 or demo order type 05 as you cannot transact an Agency sale on an adopted vehicle or put an adopted vehicle on a demo funding plan.

---

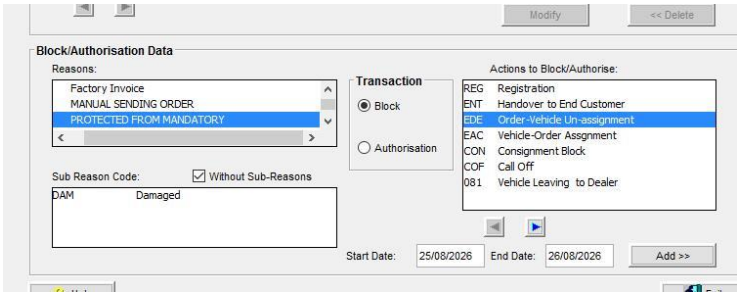

42) When retailer calls in to make any amendments for GTI 50 Limited Edition.

- They must fill out a specific form they can find in **VW1437-25**
- They must send the Confg Code "GeneralistSales@vwg.co.uk" as we have to keep a record and product & supply team will keep an eye on the request

---

43) In case you are de-tagging a Skoda vehicle and the status is from 36 to 40, you need to add a block for 24 hours **SK1009-18**

Right-click on vehicle details
Go to Vehicle block/Author.Main
Choose from the left side (Protective from mandatory), and on the right side choose EDE

---

44) If a retailer asked you to transfer a vehicle to their stock or showroom and he doesn't have an order number.

You took the VIN or Chassis , wrote it on SLI and found no order number , This will not allow you to right click and choose order modification to make the transfer.

In this case:

Open SLI
- Write the VIN
- Right click and choose order entry from vehicle
- Fill the yellow boxes with the info you have (retailer number and so on)
- Remove the quota mark
- Click save
- An order number will appear
= Take it and make the normal transfer from the order management

---

45) When the retailer wants only to add the customer contribution number to the order and did not ask for any quotation

1- The first step it to take the customer type- the first and second RFO

2- De-tagg it

3- Click on order modification and then click on Quot button and add the customer contribution number, then click on the PO and as normal process of the quotation just add the customer type and the first and the second RFO and that is called "Re-tag"

No need to provide the new quotation number, Just inform the retailer that you added the customer contribution number as per his request

Last thing, once you de-tag the order type will be as 07- in stock and once you re-tag it will be updated by the system to the original order type

---

46) (CV) if there is no order num and the vehicle is not assigned to the retailer.
How to valuate a vehicle ?
- open vehicle detail
- click it he paper with the green tick on the bottom left
- press valuate

---

47) n case you get a retailer calling about a concern that seems to be related to customer support and not brand support

Customer care numbers
Skoda - 03330037504
VWPC- 0800333666
Audi - 0800699888
VWCV - 08007834909
Seat –08085222222

---

48) Guys, if you get any queries relating to Lead times, these are in the Production and Supply updates for each brand, these are calculated from the Acceptance date. so for Example if the acceptance date is 20.08, and its a lead time of say 17 weeks, they wont see that vehicle until the end of Nov beginning of Dec, thats barring no delays etc.

---

49) Regarding the skoda de-tag 24h block, take care guys if it has a transport order, don'tmake this block

---

50) **What prevents a demo plan from going on funding:**

1- SAC code in SLI (for WVPC only) , if this field has a code in it, it needs to be removed.

2- if there is no demo plan number (the retailer did not add it).

3- If the vehicle is not partially registered.

3- If the consignment status is not C.

4- If there's a GIS error.

5-If the invoice code is not zero (it means it's not invoicing as a demo plan).

NOTE: If it's month's end it can take a little while to go on demo funding or for the system to process anything

- If there's a SAC code, the retailer needs to submit a form that will be directed to the tactical team and they will remove it.
  bulletin for the form: **VW1218-16.**

---

51) **Customer wants know when vehicle build will start**
Until it is confirmed (status 20) we are unable to advise when build will start - we can advise the lead time at the time of ordering however, it has been on order for quite some time now so just looking on the hub to see if any updates for Enyaq as its nearly 2 months and still at status V
it was 16 weeks from accepting date

---

52) Is there a time frame for the vehicle to move from St: 38 to 40? i have a retailer saying it was released to ship on the 31st of last month, and its not showing on the Vehicles on factory hold in Emden

3 weeks Approx time from Emden arrival to UK arrival - this assumes the vehicle has been called off and is required within 30 days.

---

53) CV Team - **UNR51 Sound Emission - Update -** if the vehicle has a NSSTA it is ok it does not need a IVA too

---

54) You can do transfers over the phone / no E-form only for "Tanya Smith 25079".

While proceeding go to "Order modification" and make sure to confirm:
When they need the vehicle (required date and confirm which address check drop point)

she means transfers from stock list from Brand. Toniya has Skoda authority

---

55) Everyone **Remember that 26079 - RRG is a Škoda retailer**. Please refrain from transferring cars from their account over the phone, specially when they've already been customer tagged.

Over the past two weeks, I've received a number of embarrassing responses from them regarding their cars being transferred without their permission.

---

56) While we process stock matching (stock replacement) for agencies, we do not provide price protection for VWPC vehicles. Additionally, we verify that both SLIs share the same RFO before de-tagging the original order number, which is always listed first on the form.

---

57) if a retailer calls to tag a vehicle under his stock and you only have the VIN and SLI is not providing an order number:

1) you go to order entry from vehicle
2) you add the retail code in the order retailer box in yellow
3) you ask the retailer for the required date
4) reason : CF

---

58) Do not transfer SKODA Mandatory unless it is for a customer order 00

Reject requests.
05-demo,
06-showroom
07-Stock

---

59)

Good morning

Thank you - That was quick

As the car was an 09 sale the car should no longer be in our stock?

From the Hub -

Network non-counting de-tags (OT 03, 08,09, 11)

Any de-tag requests for order types 03, 08, 09, 11 will need to be requested via the Sales Office. An order that is status code 30 or earlier (SC30, SC20, SC10, SC00)* will be removed from a Partner's stock and there will be no option to retain the car. The only exception to this is for vehicles ordered with exclusive paint when the Centre is required to retain the vehicle.

Regards

Darren

---

59) If a retailer submits a transfer request without specifying that they want to transfer customer information, the transfer is processed and de-tagged by default.
This happens because the option to keep customer details is left unchecked unless explicitly requested.

In these instances, you should manually re-tag the account and remind the retailer to explicitly request to save the customer information for future transfer submissions.

To get the customer details from de-tagged vehicle, go to the yellow telephone and press this icon ↓↓↓

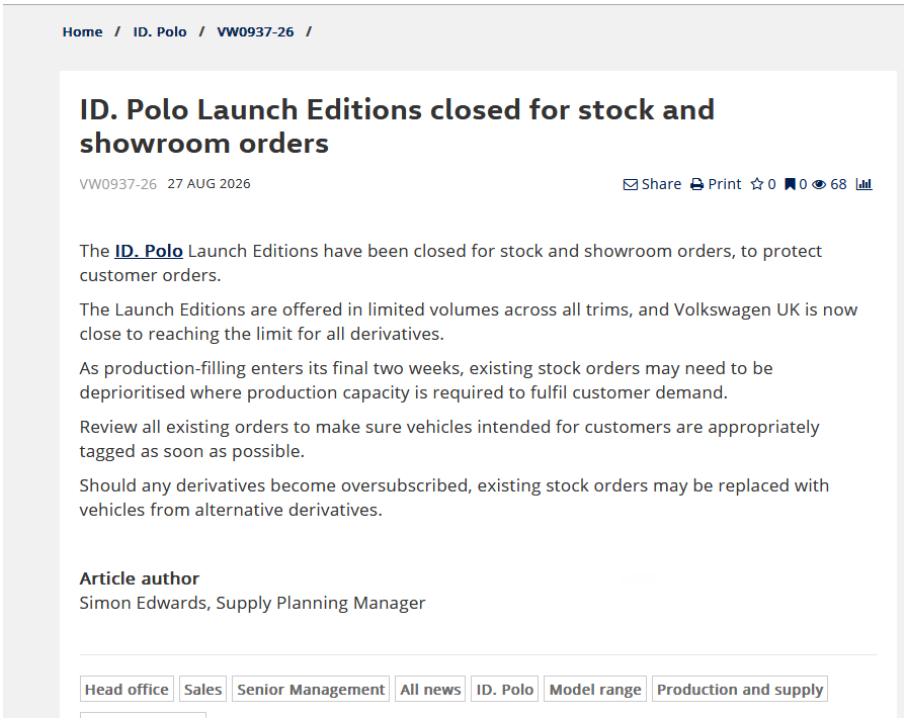

Open another SLI to follow Re-tagging Steps:

- Navigate to Order Modification > Customer Entry.
- Enter the Customer Type.
- Input the contact information and click Find.
- Click the Telephone Icon located on the middle-right of the SLI screen.
- Enter the customer details.

Note: Re-tagging is not our standard process, please complete it if your workload permits. Once resolved, confirm with the retailer and ask them to verify the customer information in SLI.

---

Home / ID. Polo / VW0937-26 /

ID. Polo Launch Editions closed for stock and showroom orders

VW0937-26 27 AUG 2026 Share Print ☆ 0 0 68

The ID. Polo Launch Editions have been closed for stock and showroom orders, to protect customer orders.

The Launch Editions are offered in limited volumes across all trims, and Volkswagen UK is now close to reaching the limit for all derivatives.

As production-filling enters its final two weeks, existing stock orders may need to be deprioritised where production capacity is required to fulfil customer demand.

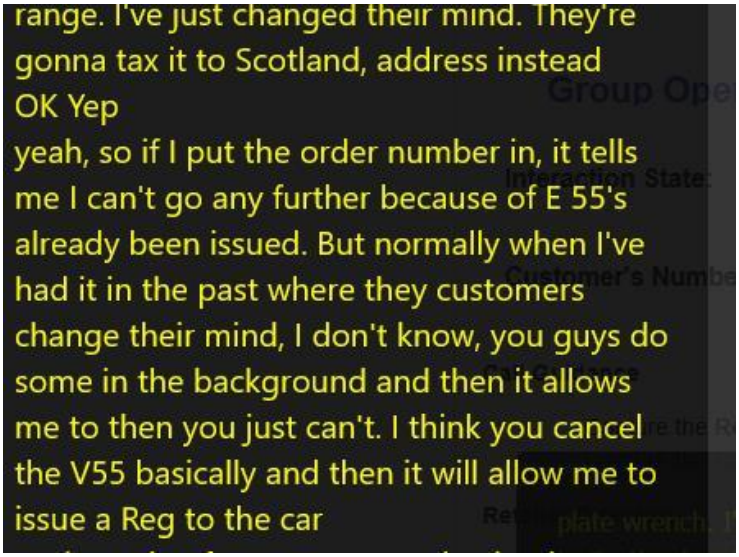

Review all existing orders to make sure vehicles intended for customers are appropriately tagged as soon as possible.

Should any derivatives become oversubscribed, existing stock orders may be replaced with vehicles from alternative derivatives.

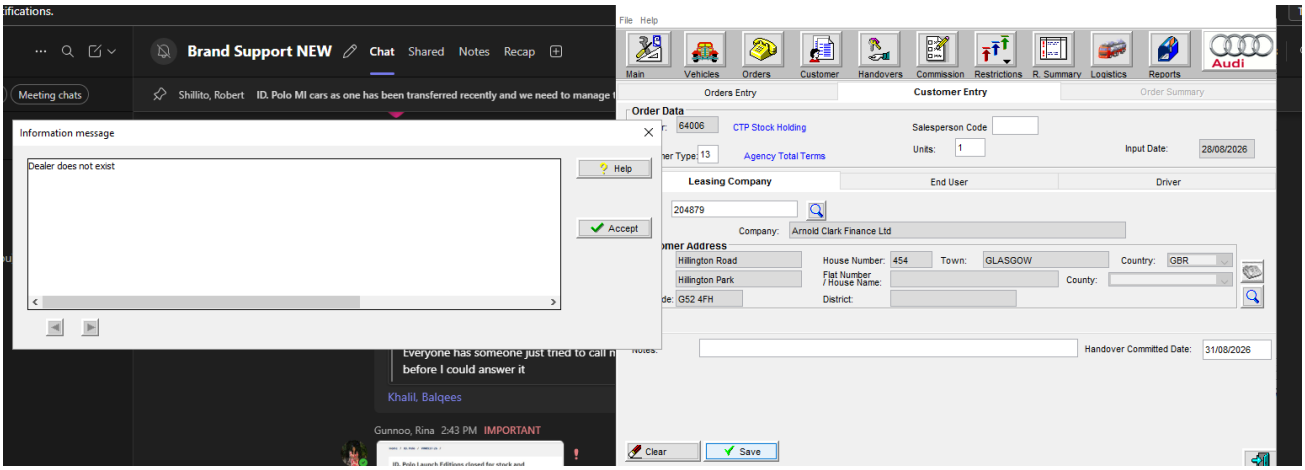

Article author
Simon Edwards, Supply Planning Manager

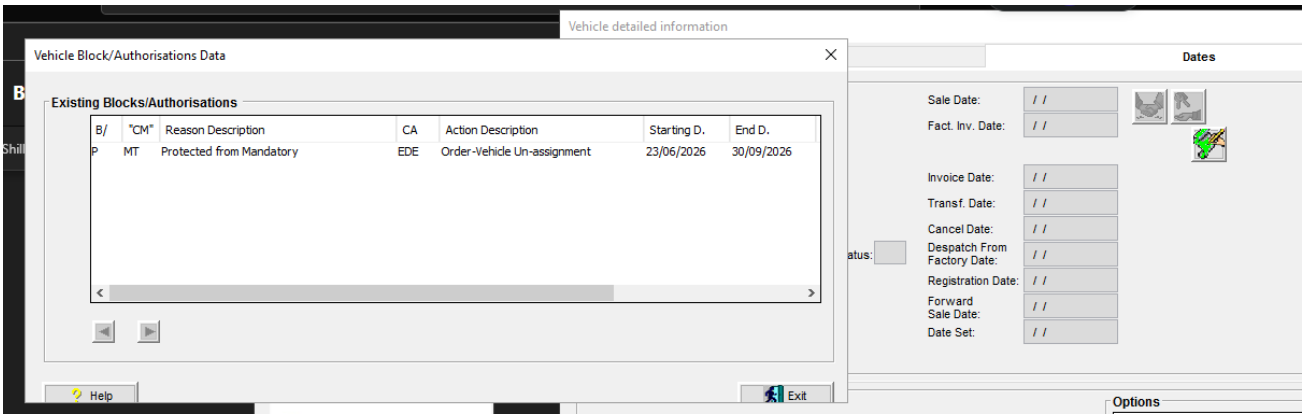

Head office | Sales | Senior Management | All news | ID. Polo | Model range | Production and supply

61) In case you want to cancel the V55 we do it from Rav.

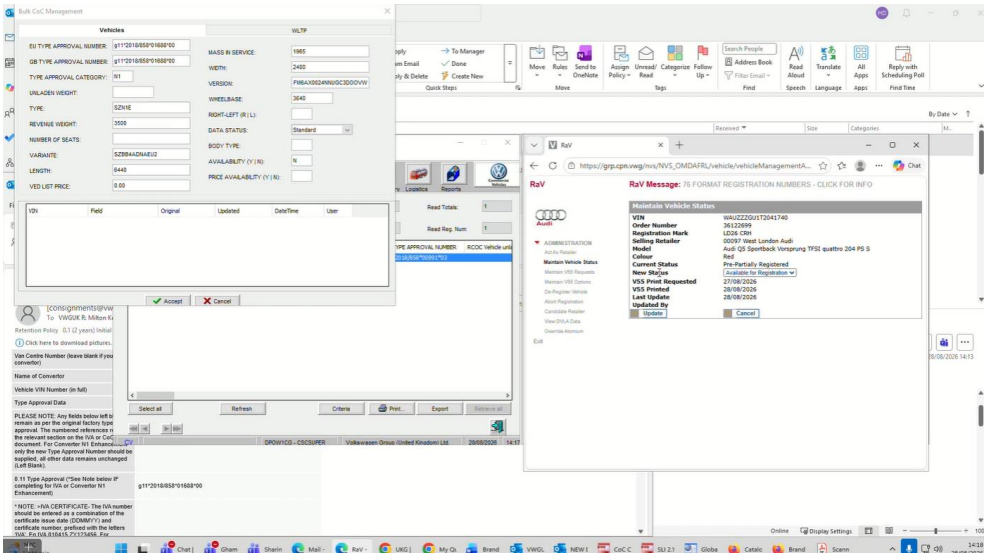

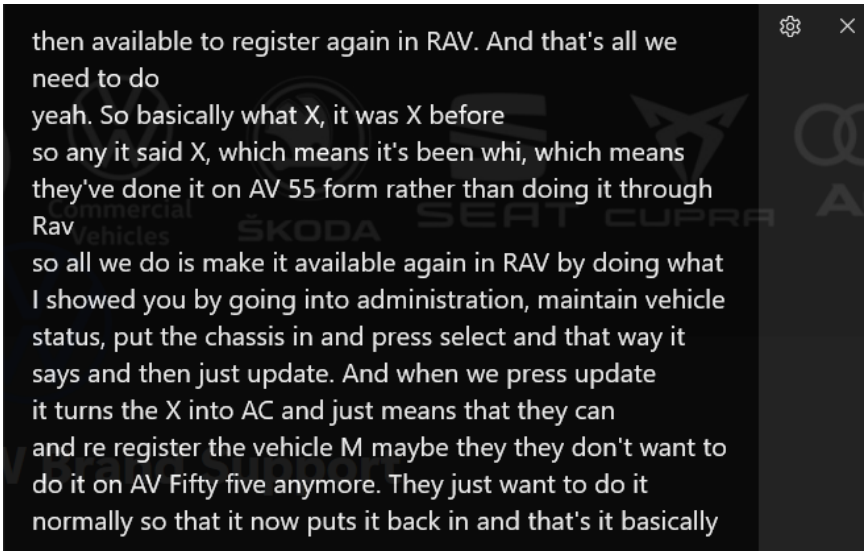

62) You cant quote on these as its in 64006 stock which is CTP stock (holding stock account)

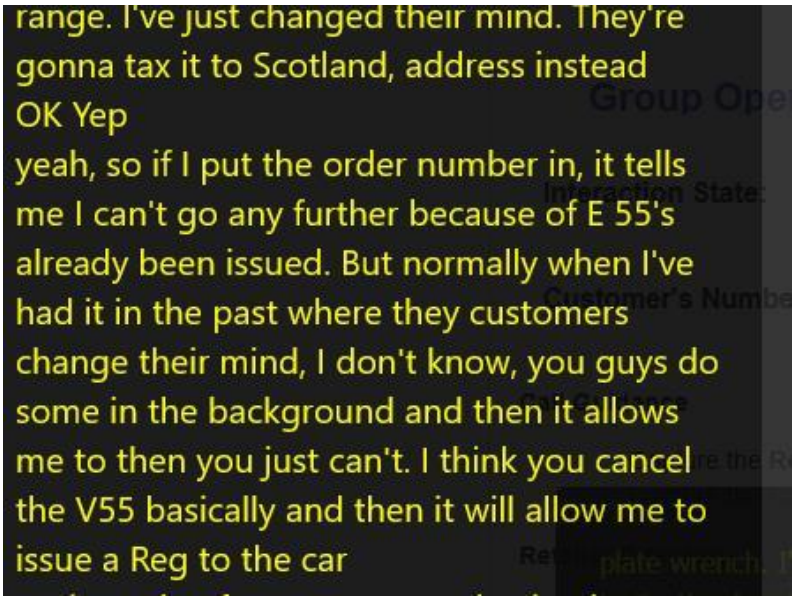

63) In case a retailer wants to cancel the V55, we do it from RAV

---

64) Un-adoption notes : (

- If the register status of the vehicle was partially pre-registered (Z) or partially registered (P) and the un-adopt form reason was to be tagged as a demo plan , in this case :
  1- We un-adopt the vehicle
  2- Go to order modification and check the order type
  3- If the order type was on a demo plan , you just remove the invoice block and **DON'T**

  FORWARD SALE DATE.
  4- If the vehicle was not on a demo plan , then reply back to the retailer asking them to tag it as a demo plan first after that go and remove the invoice block.

- **In all cases of un-adopt if you found the reg. status (z) or (p) DON't FORWARD SALE DATE and only REMOVE THE INNVOICE BLOCK**

- If you received an un-adopt form , put the VIN or Chassis on the SLI then check..
  1- I**f it has a demo plan number** on the upper top right sceen of the SLI, go to GIS and write the VIN
  Click browse
  Choose Financial Data
  Scroll to the right
  If you found a **demo plan code** (has numbers not empty)
- **REJECT the form** , reply back to the retailer and make them contact the support team related to the brand.

---

65) Negotiated:

- The vehicle belongs to another retailer.
- The requesting retailer must contact the owning retailer to get permission for an internal transfer.

- If they cannot transfer it directly, the owning retailer must submit a transfer form.

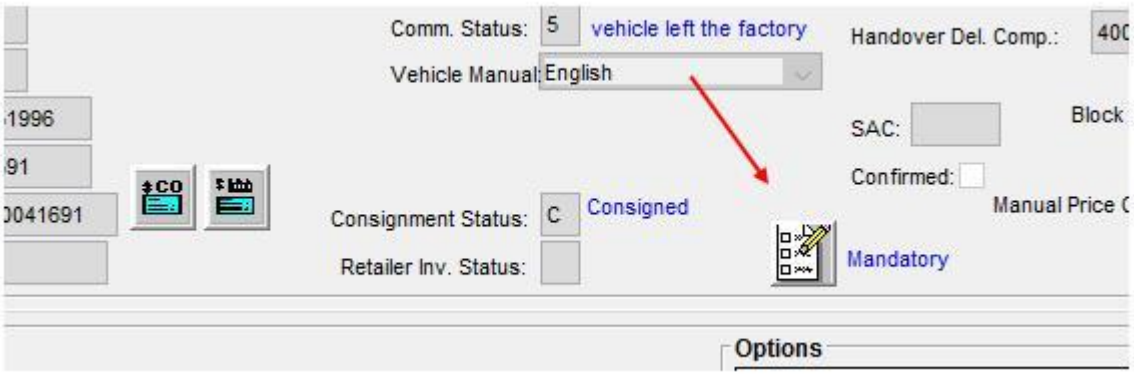

Mandatory (National stock):

- The vehicle is in the owning retailer's account tagged as stock and will show as mandatory
- If a consignment request is pending, the vehicle is locked until requested consignment is complete.
- The retailer who asked for the mandatory car must **tag the vehicle immediately** upon consignment to secure it.
- If it's fully consigned and untagged any one can take it from this retailer without a form or a permission as long as it shows mandatory

For Škoda vehicles in the national stock where the RDC starts with a **3** (e.g., 31959), requests cannot be made via phone or e-forms. They must email these requests directly to **vehiclesupport@skoda.co.uk**.

Mandatory will show available when doing a Stock query search in SLI, as long as it's **07-Stock**, it's fine to transfer to their account.

If for any reason the RDC provides the VIN and the vehicle is 06-Showroom (Even if it shows Mandatory in SLI) this cannot be allocated to the retailer.

- The SLI Stock query search;

Importer (free no owner), avaiable to take by anyone.

Mandatory (available to take for customer orders only in SKODA

Negotiated (RDC can self manage this request) any issues/error with the transfer? The owning retailer must submit the e-form.

66) For Skoda we are **temporally** asking that all requests to allocate vehicles from Fleet stock list **31959** are emailed to vehiclesupport@skoda.co.uk **(no call or e-forms)**

If it's in Mandatory and available under a regular retailer code for example: 2xxxx, you can do it over the phone for Customer Orders only

The email is only for Fleet stock list **31959**

---

67) VWPC delayed vehicles

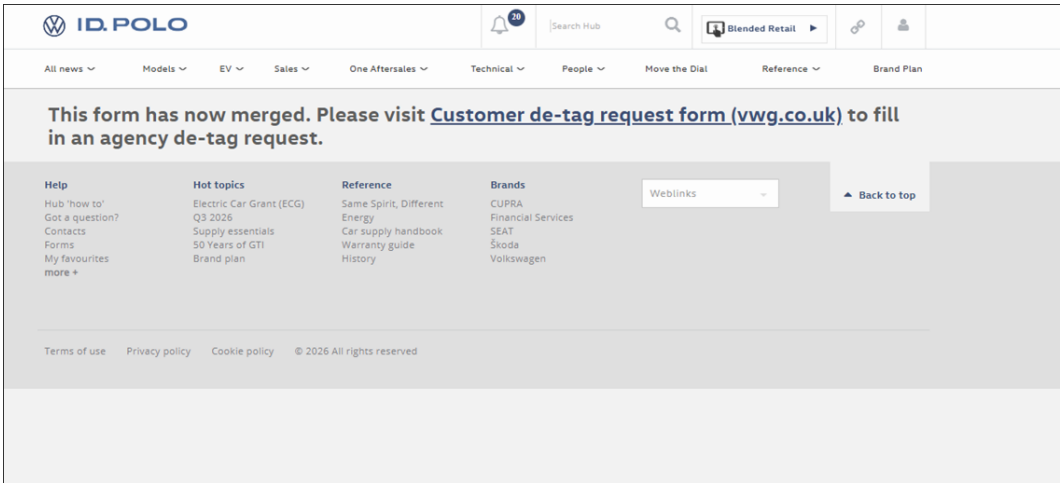

The brand has changed how delayed vehicles are managed and viewed. The delayed vehicle report is now available exclusively via the Vision portal, allowing retailers to view and manage their own delayed vehicles directly.

As part of this change, the Sales Office no longer has access to the delayed report, and we are therefore unable to escalate delayed vehicles to the Supply Team.

If you have any concerns regarding the information shown on the delayed report in Vision Portal, or any additional queries about the report, please contact your Sales Support Manager, who will be best placed to review and address any issues or escalation requests.

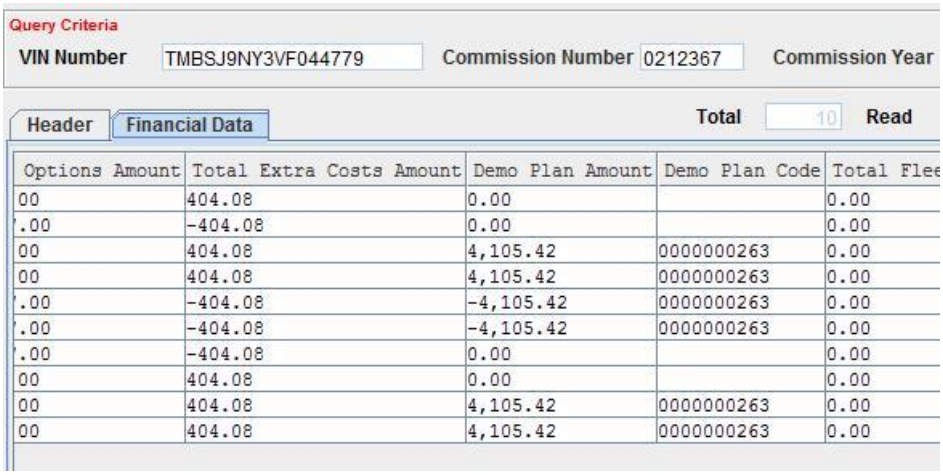

---

68) The agency e-form has been merged with the customer de-tag form, so there is no longer a need to ask retailers to submit separate agency de-tag requests.

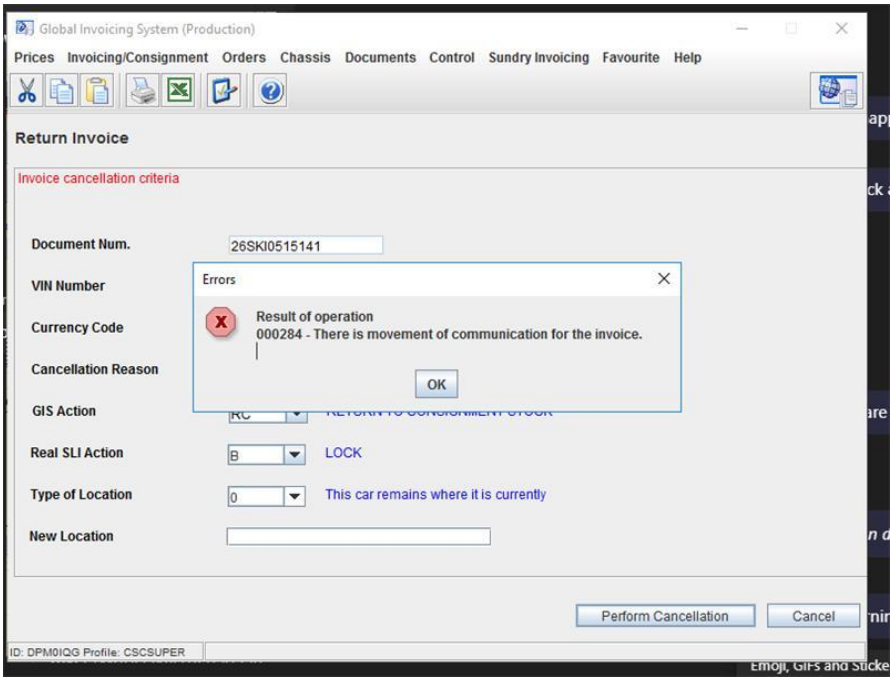

---

69) If a vehicle has a demo code in GIS under financial data dont unadopt- send it to specialist inbox

Options Amount	Total Extra Costs Amount	Demo Plan Amount	Demo Plan Code	Total Flee
00	404.08	0.00		0.00
.00	-404.08	0.00		0.00
00	404.08	4,105.42	0000000263	0.00
00	404.08	4,105.42	0000000263	0.00
.00	-404.08	-4,105.42	0000000263	0.00
.00	-404.08	-4,105.42	0000000263	0.00
.00	-404.08	0.00		0.00
00	404.08	0.00		0.00
00	404.08	4,105.42	0000000263	0.00
00	404.08	4,105.42	0000000263	0.00

This error means the vehicle was invoiced today and you have to wait till tomorrow to unadopt it.

If there is a reg on SLI (Z or P) and you are doing unadopt, it will not let you forward sell it , it will come up with error registration process has already started.

2 options:

1. retailer aborts the reg, you forward sell it and remove the block.
2. retailer keeps the reg on, you must advise them to contact us back to remove the block.

If you remove the invoicing block after unadopt form this will make the vehicle invoice it self again straight away

If a vehicle is in 31959 stock - email vehicle support

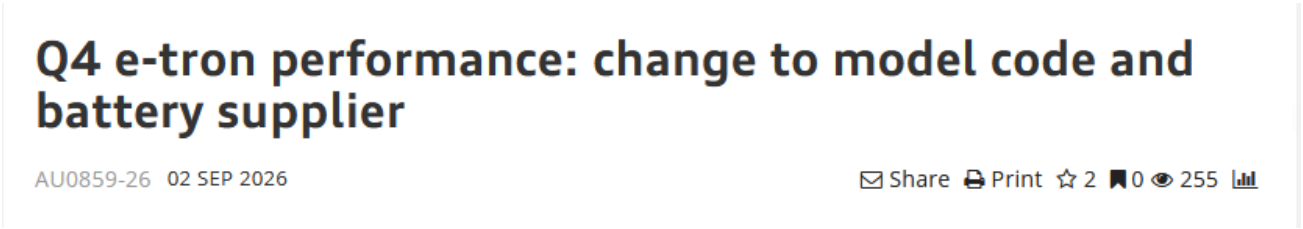

---

70)

- **(All brands) :** Once a vehicle is at PSC 40, it will take 10 days for the vehicle to get to the RDC.
- **(WVPC) :** The VIP Portal will only allow you to track the delivery of a vehicle once you check the status code "40" , there's an actual transport order has been raised (TO), there's a compound entry date (from red truck at the bottom of the SLI).
- **(All brands) :** The retailers has to provide Letter of confirmation from the DVLA in order to process a de-registration.
- **(All brands) :** If the vehicle has been registered and the retailer wanna de-register it again he need to wait 7 days from the last registration date.

---

71) AU0859-26

---

72) **When the retailer wants to fund a vehicle on a demo plan:**

Verify that the vehicle meets all **five** of these exact criteria before proceeding:

- **(WVPC only) SAC Code** must be **completely blank** in SLI. If a code is present, it blocks the plan.
- The retailer must add the demo plan number to the vehicle on SLI.
- The vehicle must display as **Partially Registered**.
- The status of the **Consignment** must show as **C**.
- There must be **no** errors on GIS.

If the checklist criteria are met but funding is stuck, check the **Invoice Code** box:

- **If the Invoice Code is '0' so** the system is correctly processing it as a demo plan.
- **If the Invoice Code box is empty** Right-click on SLI ➡️ Select **Invoice Order Entry** ➡️ Click **Accept**.
- **If the vehicle has a "request to consign" status**, the retailer must wait for bank clearance.
- Remind them to ensure **sufficient funds** are available in their account for the bank to complete it.

If a SAC code was found you can do the following:

- The retailer should submit the standard request form via **Bulletin VW1218-16**.
- The form routes to the **Tactical Team** who will handle the removal.

If you want to do it over the phone if it is the end of the month and you need to clear the code manually for them:

1. In **SLI**, select **Multibrand**.
2. Go to **Vehicle Details** and search the **Order / VIN Number**.
3. **Right-click** the record.
4. Click **Modify SAC Code** *(This option only appears if a code exists)*.
5. **Delete the code** and click **Accept**.

To confirm the vehicle has successfully transitioned onto demo funding:

1. In **GIS**, go to **Documents** ➡️ Select **Consignment/Invoices of Chassis**.
2. Open the **Financial Data** tab.
3. Scroll horizontally to the **Demo Plan Code** column.
4. **Evaluate the rows:**
    a. ✅ **Funded:** If **two rows** are completely filled with the demo plan code (matching the SLI code), funding is live.
    b. ❌ **Not Funded:** If the rows are incomplete or empty, the vehicle is not yet on demo funding.

Quick log it as :

Brand support ➡️ Supply ➡️ Invoice query ➡️ ...

73) **For PC**

Supply

- Debra advised that some vehicles stored at Ahlhorn during the period of time Emden Bridge was being repaired have not yet transferred back. This is now being looked at.

- She also advised that the new Extended Warranty although live on the configurator is missing costs for the Polo and ID.7 Tourer. Digital are working on this as a priority so no need to make contact please as they are aware. HUB VW0217-26.

- To secure the allocated production volume for Golf GTi EDITION 50, Volkswagen UK will release all orders to the factory this week. All orders will be released by close of play (COP) on Friday 11 September, ready for production to be scheduled in the following week. HUB VW1437-25.

- Simon advised the Port position is currently looking good.

Product

- Selina advised of 1st October price increase.

- Selina also asked that we chase the last MY26 4Motion that will not build as a MY27 reference SLI 36296605. We advised we will chase for a response immediately from the Retailer.

- The ID. Polo Launch Editions have been closed for stock and showroom orders, to protect customer orders.

See HUB bulletin VW0937-26

Sales Support Managers

- Just to clarify again from Bill….. the ID. Polo MI cars have now been allocated – the MI cars can be identified in SLI as having 'S0C – Intro volume' in options box.

These cars have designated purposes, and we (SSMs) are in the process of tagging 2 cars per retailer to demo. They will also have one car designated as the showroom display car leaving one car as stock.

The message to the team is PLEASE DO NOT detag or modify the spec of the MI cars – if retailers are questioning this, refer them to the Believe in ID Guide on HUB using bulletin VW0342-26 or they can speak to their SSM. Here is a breakdown of the MI allocation and the purpose for each one.

Market introduction cars

Retailers will be allocated with three to five market introductory (MI) cars. A typical allocation is as follows:-

1 x Style 52kWh Launch Edition
1 or 2 x Life 52kWh Launch Edition
1 x Life 37KWh Launch Edition

In addition, these cars will also have reg blocks on them which are aligned to the launch of the car and therefore should not be removed.

Demonstrator standards

Retailers will be required to run a minimum of two demonstrators at all times. These are stipulated and tagged by Volkswagen UK as:-

1 x Life 52kWh Launch Edition

1 x Life 37kWh Launch Edition

Showroom standards

Retailers will be required to display one ID. Polo in the showroom at all times. The showroom car will be stipulated by Volkswagen UK as:-

ID. Polo Style 52 kWh Launch Edition.

Lisa advised of the following changes.

As of today, 02/09/2026, please use nationalsalessupportmanagers@volkswagen.co.uk to contact your Sales Support Manager.

Following Cathy Quinn's retirement, SalesSupportSouth@volkswagen.co.uk will be closing shortly.

The new mailbox will be managed by Lisa Haddon, Bill Watton and Emma Thomas, who will be providing support to retailers across the UK. As part of this change, we will be operating as a national team, meaning there will no longer be a North/South split in support coverage.

---

74) When Retailers Ask About: Tiguan R-Line Stock / Showroom Delayed Orders :

All retailer-ordered stock at **Status 00 and 10**, plus showroom cars (**Order Types 06 and 07**), will be automatically converted by the system, these vehicles will instead be built with the **20-inch 'Leeds' black/grey diamond-turned alloys (PJT) and there's n**o manual action required from the retailer for these specific stock/showroom orders.

Inform them that due to an extended supply restriction on the standard 20-inch 'York' Black diamond-turned alloys (PJU), the factory is automatically converting these orders to ensure the cars can be built and delivered to the network.

When Retailers Ask About: Tiguan Black Edition Delayed Orders :

To bypass the production bottleneck and prevent further delays, we strongly recommend that the retailer manually convert these orders.

They should update the specification to the 20-inch 'Leeds' black/grey diamond-turned alloys (PJT).

Advise them that the standard 20-inch ‘York’ black alloys (PJR) for the Black Edition are also heavily restricted. Unlike the R-Line, these will NOT be automatically converted by the factory, meaning these customer orders face significant, ongoing production delays.
For further guidance you can refer them to the bulletin : **VW0629-26**.

---

75) **For Audi Stock Match** :Audi stock replacements must belong to the exact same model group example : (**Q4** SUV to **Q4** Sportback, or **A3** Sportback to **A3** Saloon).

---

76) Script for delayed vehicles VWPC:

Let me explain what's happening and how you can track it.

For any vehicles that currently have no transport order, no compound entry date, and are under status 38, you’ll want to check the Vision Portal for updates.

If you don't have access to the portal just yet, you can request it—just make sure to read bulletin VW0967-21 first.

Now, if you check the portal and the vehicle isn't listed there at all, it's actually due to the six-week summer shutdown that started at the end of July. Because the factories are currently closed, some vehicles might actually be built already, but they are delayed from moving.

Once operations resume around September 15th, they will start shipping those built vehicles out immediately.

If you do see it on the delayed report in the portal and have any specific concerns or need to escalate it, your Sales Support Manager is the best person to contact.

They can review the report with you and handle any escalation requests directly.

Salesforce process :

Subject : VIN

Description : (Retailer's name) called to check on his vehicle's build status. I referred him to the Vision portal, noting that the vehicle is currently at status 30. I explained that if it is not listed there yet, it is due to the summer shutdown. Once operations resume around September 15th, they will begin shipping vehicles. While some units may already be built, they are also facing delays

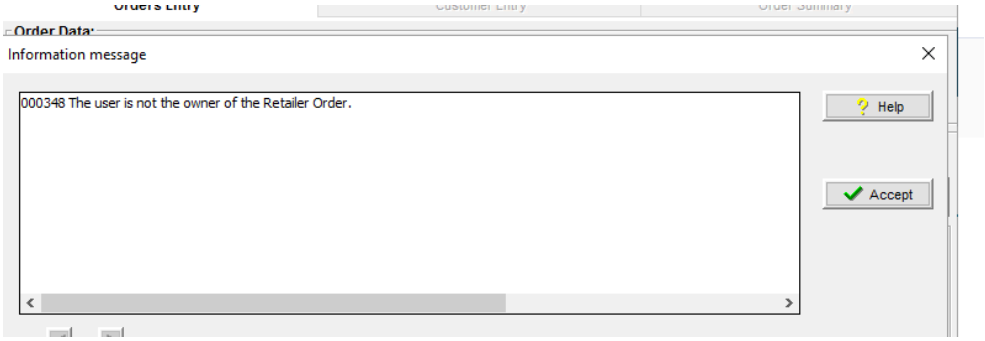

L1 - Group Operations - Brand Support L2 - Vehicle Delay L3 - Vehicle delayed at factory L4

---

77) Just an FYI, if anyone is asking you about when they will see a vehicle, or when it will be delivered, if that vehicle is not status 40 with a transport order raised, it will not show in VIP (we covered this in Training)so there is no use looking, SLA period's for shipping in September go up has this is a really busy month

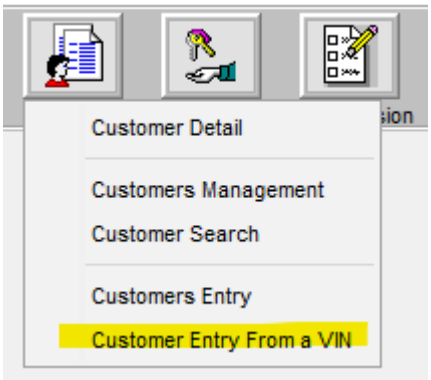

---

78) I received a call and the retailer couldn't tag the vehicle because she wasn't the owner of the retailer and the vehicle was adopted

To tag a vehicle that's already adopted (To a retail\customer)

1- Open SLI- click on the customer icon- choose "Customer entry from a VIN"

2- Fill in the requested details as follow:

- customer type:
- title:
- first name:
- last name:
- postcode:
- door number or address:
- mobile number:
- email address:
- marketing permissions:
- Hand over committed date

3- Click "Accept"

Note: If the retailer wants to tag it to agency, and the vehicle is adopted, tell them to submit an un-adopt form first to be able to tag it the right way- we cannot tag an adopted vehicle as agency.

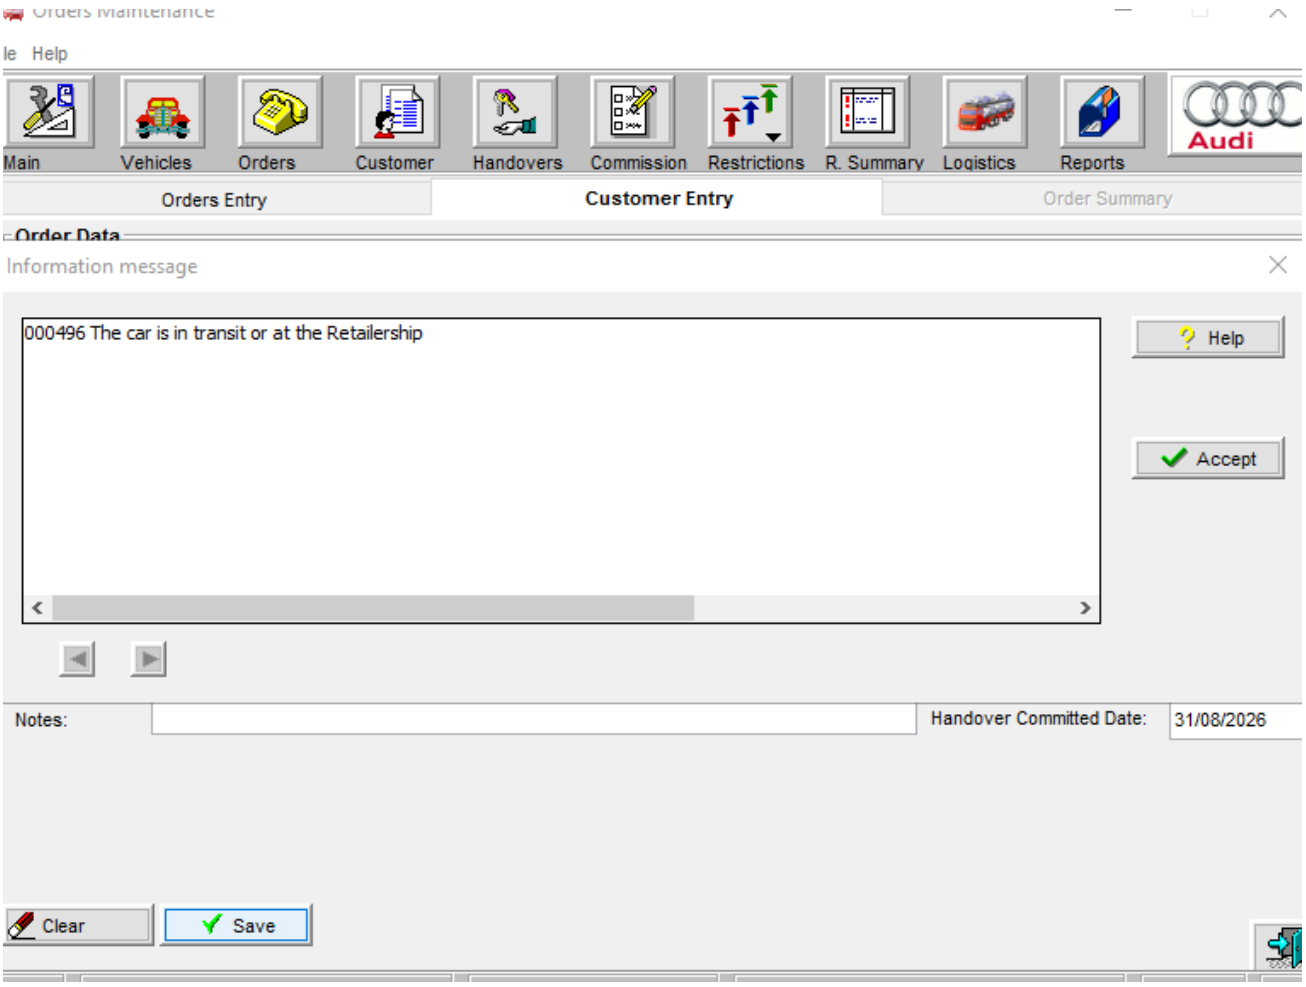

---

79) Golf performance stock orders currently suspended VW0643-26

---

80) Audi -If we receive an error message (000496 the car is in transit or at the retailership) while quotation and the status is 70, we get it back to status 40 and make a ticket to the business team to take it back :

1-the red truck icon-
2-right click-cancellation of arrival to retailer-cancellation of dispatch to retailer (click accept in both)
3-red car (front screen)-refresh till the status changes-
4-right click-order modification-tag it again to the original order (the order type and so on)
5-click on quot. (the normal quotation steps)
then submit a tkt

81) **information regarding 26 reg plates** Hi Kirsty,

What dealer number are they? I can manually remove them mark by mark from RAV, but this is very time consuming so isn't something we're going to be able to do regularly throughout Sept for multiple dealers & can only be done when we have spare capacity in the team to work on it.

We are currently monitoring numbers of '26' marks still allocated to vehicles in RAV and will be removing all the '26' marks once the numbers get down to sufficient levels, but this is a bulk function that can't be done at dealer level and if we do it while there are still a lot of '26' marks allocated it will cause errors on those vehicles when dealers try to allocate '76' marks (hence waiting for the numbers allocated to drop to a low enough level not to cause too many issues).

We do currently have a message on RAV (below) asking dealers to abort all their '26' marks:-

"All VINs part registered with a 26 VRM must be aborted asap. Failure to do this will lead to an error message when you attempt to link the VIN to a 76 VRM at a later date.

The quickest way to identify any VINs linked to a 26 VRM is to select 'Search' on the RaV 'Select Vehicle to Register' screen, this will display all VINs available in RaV and the VRMs they are linked to. 26 format VRMs cannot be deleted from your Pools in RaV until the majority of vehicles part registered with a 26 VRM have been aborted."

82) VW bank contact details :

01908485058 / 08451209931 bsoperationsteam@vwbank.co.uk
